2. N42 noise.

Replacement of timing chain tensioner can be efficient solution to this problem. It should be changed every 60,000 miles (100,000 km) of mileage. At the same time N42 has not very reliable timing chain. It starts making noise and stretches every 60,000 miles (100,000 km) of mileage.

I have a 01/2002 build date E46 318iSE (2.0l 4 cyl) Touring (N42 engine) which has a problem. The engine cut-out last night while slowing down for some traffic lights. It wouldn't immediately restart. After a 5 minute wait it did restart but then cut-out again (revs drop to 500rpm then cuts-out after a minute of idling).

BMW N42 - Wikipedia

The VANOS system isn't unique to the N54 engine; it is used in many variations of BMW engines.

However, for tuning purposes it is important to at least be able to identify VANOS problems, and know how to fix them as a faulty solenoid can
