Operational Principles 1. Know what outcome you want to achieve. (See nlp principle 1 - achieving outcomes.) 2. Have sufficient sensory acuity (acuity means clear understanding) to know if you are moving... 3. Have sufficient flexibility of behaviour so that you can vary your behaviour... 4. Take ...

### Neuro-Linguistic Programming (NLP) - BusinessBalls.com

General Principles. NLP is a model rather than a theory - and it is the study of subjective experience. NLP is a generative rather than a repair model - it emphasises finding solutions rather than analysing causes - and in NLP we always add choices, rather than take these away. Mind and body are part of the one system.

### The fundamental principles of NLP - Pegasus NLP

NLP was developed by Richard Bandler and John Grinder, who believed it was possible to identify the patterns of thoughts and behaviors of successful individuals and to teach them to others.

### Neuro-linguistic programming (NLP): Does it work?

Neuro-linguistic programming ( NLP) is a pseudoscientific approach to communication, personal development, and psychotherapy created by Richard Bandler and John Grinder in California, United States in the 1970s. NLP's creators claim there is a connection between neurological processes ( neuro- ),...

### Neuro-linguistic programming - Wikipedia

NLP Principle Three - Changing Behaviour. The third operational principle of NLP is to vary your behaviour until you get the response you want. If what you are doing isn't working, then you need to do something else. You should use your sensory acuity to determine if what you are doing is leading you in the desired direction.
